## KR324 SHUTTLE FEEDER

The stand alone KR 324 shuttle feeder handles a wide variety of media from single sheets and envelopes to books and magazines.

Smaller than the KR 224 shuttle feeder, the KR 324 accommodates products 3" wide by 5" long up to 14" wide by 14" long.

Like all shuttle feeders, the KR 324 runs continuous because its hopper is loaded from the top and feeds from the bottom.

Equipped with a DC variable speed motor, vacuum pump and roller cabinet, the KR 324 works with most inline addressing systems.
